

# ALQUERFEED ANTIOX

## DESCRIPTION

Antioxidant in powder premix or in oral solution.

## TECHNICAL PROPERTIES

**ALQUERFEED ANTIOX** is an antioxidant composed of two different groups of antioxidants:

Ethoxyquin and B.H.T. are real antioxidants that block the chain-reactions that occur during oxidation.

Citric acid is a secondary antioxidant, synergistic with ethoxyquin and BHT, due to its ability to bind the metal ions that catalyze the oxidation reactions.

**ALQUERFEED ANTIOX** preserves the fats and liposoluble vitamins during the fabrication and storage of the feed, the absorption in the intestinal tract and the metabolism of the nutrients. The aspect and palatability of the feed is maintained.

## INDICATIONS AND SPECIES

It is used to prevent the fats, vitamins and carotens present in feed materials of birds, pigs, sheep, goats and cattle (of any age) from oxidating. Use only for animal feeds/fodder manufacturing.

## COMPOSITION

Ethoxyquin (E-324)	100 g
B.H.T. (E-321)	50 g
Hydrogen potassium orthophosphate (E.340)	150 g
Citric acid (E-330)	50 g
Excipient to 1000 g.	

## DOSAGE

Mix with the feed at a doses of 125 gr/ton. If it is necessary the doses can be increased to 1 kg/ton at which doses the maximum legal dosis of 150 ppm of ethoxyquin and B.H.T. together will be reached (European legislation).

## PACKAGING

Premix powder: bags of 25 kg.

Solution: bottles of 1, 5 and 25 litres.
