

## AMTEVET

### DESCRIPTION

Sodium ampicillin in soluble powder.

### TECHNICAL PROPERTIES

Belonging to the group of beta-lactamic antibiotics, ampicillin is able to penetrate Gram-positive and some Gram-negative bacteria: *Salmonella*, *Shigella*, *Staphylococcus*, *Streptococcus*, *Corynebacterium*, *Clostridium*, *E. coli*, *Klebsiella*, *Proteus*, *Pasteurella* and *Haemophilus*. It inhibits bacterial cell wall synthesis, which ultimately leads to cell lysis.

### INDICATIONS AND SPECIES

Intended for poultry, pigs, sheep, goats and cattle in the treatment of:

- Poultry: onfalits, salmonellosis and C.R.D. For one-day-old chicks it is ideal as a general antibiotic.
- Pigs and ruminants: enteritis, reproductive infections and pneumonia. In pigs it is the ideal product for decreasing the microbial concentration in the intestine and for the continuous treatment in reproductive animals.

### COMPOSITION

Sodium ampicillin            250 mg  
Excipient to 1 g.

### DOSAGE

It is administered orally mixed with the drinking water, milk or feed at the following doses:

- Poultry: 0.5 grams per litre for 2 days. Continue treatment for additional three days at doses of 0.25 gram per litre. It can also be used mixed with feed at doses of 0.5 to 1 kg per ton.
- Pigs: 0.25 to 0.5 gram per litre of drinking water or mixed with feed 0.5 to 1 kg per tone.
- Livestock: 1 gram per day in milk with a maximum of 15 mg/k.l.w.

### INCOMPATIBILITIES

Not described.

### CONTRAINDICATIONS

Do not use in rabbits and horses because of the risk of disturbing the intestinal flora which can lead to the development of meteorism problems. Do not use in animals hypersensitive to penicillins.

### OVERDOSAGE

It can cause diarrhea, nauseas or vomiting that can be stopped by interrupting the treatment. In case of allergic accidents antihistaminics should be administered.
